

Radialight

IL CALORE CHE ACCAREZZA
COMFORT FOR YOUR HOME

The brand-new Radialight® catalogue marks a new stage in a history that began 80 years ago and spans 3 generations.

It is the result of a job done with passion and dedication, which has continued to evolve, always marked by a mission we see as being essential and that has not changed over time - to offer items that embellish our living and working environments, improving our comfort, and therefore the quality of our lives.

Our attention is always focussed on those who buy our products throughout the world, and every day we make our technical skill and experience available to those who design, plan and build, always in step with technological progress.

HOME HEATING

BATHROOM HEATING

SIRIO

Modern design and technology for a quick and programmed heating

The brand new range of convection heaters SIRIO by Radialight provides the most simple and economical yet advanced solution to domestic heating, while decorating your home with their modern design.

The inner aluminium heating core provides all the heat necessary to reach the required temperature as quickly as possible and, in combination with the integrated electronic thermostat, SIRIO is able to maintain the comfort level you want, with absolute, long-lasting precision.

Weekly programming, open window detection and led display: everything is designed to get a quick temperature rise and the maximum energy savings for your immediate well-being.

SIRIO convectors are light-weight and easy to install, thanks to the complete kit that comes with each product. In less than 15 minutes you can benefit from the warm embrace offered by SIRIO, without any building works and invasive electrical connections.

Heating style

SIRIO will heat your home using natural convection - the cold air passes through the lower grille, is heated by the aluminium coil, and comes out of the grille at the top, heating your domestic environments perfectly, in complete safety and without any noise, as there are no moving mechanical parts.

The electronic thermostat provides intelligent heat management, automatically reducing consumption when the temperature reaches the required level.

Features

- Electric Convactor slim and stylish design - only 10,2 cm thick, that ensure quick, uniform heating of the space
- Backlight LCD Display screen
- Maximum silence - no moving mechanical parts (fan or motors) included
- Energy-saving technology with consumption optimisation
- Weekly programming, Open window detection and Lock function
- Easy, quick installation using the built-in assembly kit, and zero maintenance costs
- Wheels are supplied as optional to make the convector portable for carrying
- IP24 protection against sprayed water, ideal for installation in wet spaces as well
- Lot 20 ERP ECO DESIGN Compliant 

Control System

Intuitive user experience with the new SIRIO interface

1 Lcd Display - 2 Mode settings - 3 Function settings - 4 Up/Down arrows - 5 Stand-by

SIRIO is fitted with an adjustable digital thermostat enabling the room temperature to be controlled, with an accuracy of 0,2°C. Choose among 5 heating modes: Comfort, Comfort -1°C, Comfort -2°C, Eco - 3,5°C and Frost protection. Weekly programmable room temperature and heating period + the open window detection function allows you to adapt the working time of SIRIO to your everyday life and also to save energy.

Technical data

The SIRIO range is available in 4 different models – from 500W, 1000W, 1500W, to 2000W – whose size and power are designed to meet the needs of every home environment

Model	SIRIO 5	SIRIO 10	SIRIO 15	SIRIO 20

Wheels are sold separately. SIRIO height with wheels is 50 cm. Depth is 28,2 cm.

ICON

Its vertical, clean, elegant shape, just 45 cm. wide, will immediately catch your eye.

A sophisticated, iconic line, a surface to be admired and touched, RADIALIGHT DUAL TERM technology, the warm embrace of radiant heating, the efficiency of convection. You can now have all of this in a single product, or rather, two, in ice white and anthracite grey, with ICON.

Be sure you have a real piece of furniture in your favourite room. Protruding only 45 cm, the ICON radiant panel will heat you and your loved ones to the core, using radiant technology certified by Radialight and with a design that will not be out of place in any room you want to try it in.

Heating Style

ICON contains DUAL-THERM technology that is two different heating systems in a single product : convection makes it possible to quickly reach the required comfort level in the room while radiant heating ensures that the front surface transmits constant and even comfort.

The electronic thermostat provides intelligent heat management automatically reducing consumption when the temperature reaches the required level.

Control System

With its user friendly keypad ICON allows to have a quick and easy access to the radiator control features.

- Easy and practice weekly programming with 3 different pre-set programs to suit your lifestyle
- Indication of the ideal energy saving comfort temperature
- Powercheck function to find out exactly how much electricity was used during the last 24 hours or 7 days
- Selection of 4 different working modes : Comfort , Eco, Frost Protection, Weeekly programming
- Possibility of safety lock of controls

Features and Technical Data

ICON is available in 4 different models with power from 750 to 2000W, suitable for rooms from 5 up to 30 square meters.

Two colors: ice white and anthracite grey, both with satin finish. A bathroom kit, separately supplied as an accessory, can be adapted to suit all the versions. It's made up of 2 aluminium towel holders and a bathrobe hook. ICON will become a towel rail in your dream bathroom

ICON Wi-Fi

Vertical shaped low consumption radiators with WiFi controls and ambient led light.

Radialight App
disponibile su:

Home automation because time is your most precious resource. Ambient led light to create a unique atmosphere in your room. Protruding only 45 cm. ICON WiFi electric radiant heater is the perfect union of design, piece of furniture, technology, comfort and energy saving. DUAL-THERM technology that combines infrared radiant heating and natural convection, remotely controlled through your smartphone for a unique comfort experience. The new RADIALIGHT App makes it possible that you individually manage each radiator, schedule operation

on a weekly basis and view consumption statistics in real time. The connection between the radiators and the router of your home is direct through Wi-Fi and therefore it will not be necessary to install bridges or intermediate terminals.

Total and precise control of the comfort of your home, wherever you are, in the simplest way possible, with just one touch of your fingers.

Discover the new generation of ICON vertical WiFi radiators.

Heating style

Control System

With its user friendly keypad, ICON allows to have a quick and easy access to the radiator control features.

ICON Wi-Fi integrates a digital display to manually access the radiator control functions. Therefore ICON Wi-Fi can be used also when Wi-Fi is not working.

Combined with your home Wi-Fi and the Radialight App, you can manage your ICON radiators installed in your home, creating a multi-zone system and independently controlling the comfort level of each room; obtain consistent energy savings thanks to weekly programming or simply manage heating during your periods of absence. Furthermore, the Radialight App will allow you to view, analyze and compare the consumption of each individual radiator to avoid unnecessary energy waste.

Features and Technical Data

ICON WiFi is available in 2 different colors: ice white and anthracite grey, both with satin finish. 4 different models with power from 750 W to 2000W suited to heating rooms from 5 sqm to 30 sqm. The bathroom kit, supplied separately as an accessory, can be adapted to suit all the versions. It is made up of two aluminium towel rails and a bathrobe hook. ICON WiFi becomes a towel rail in your dream bathroom.

KLIMA

Radiators with digital control for Energy Saving

Digitally controlled radiators, with built-in, exclusive Radialight® DUAL-THERM technology - two different heating systems incorporated in a single infrared radiation and natural convection unit.

Comfort management, controlled by the built-in electronic unit, ensures

a sensation of pleasant, diffused heat, and wellbeing that embraces you. These modern functions help to save on energy consumption, limiting energy bills.

This is KLIMA.

Heating style

Comfort and wellbeing guaranteed by the infrared and natural convection systems built into the radiator, for quick even heating of spaces, as well as a sensation of warmth beyond compare, that is long-lasting, pleasing, and embracing.

The temperature control system optimises the radiator's consumption as the heating level set is approached, which allows maximum energy saving.

Comfort and wellbeing guaranteed by the infrared and natural convection systems built into the radiator, for quick even heating of spaces, as well as a sensation of warmth beyond compare, that is long-lasting, pleasing, and embracing.

Control System

With the user-friendly keypad, KLIMA allows you to quickly and easily gain access to the radiator control features.

Easy and practical weekly programming, with three pre-set programmes to suit your lifestyle

Powercheck function to find out exactly how much electricity was consumed in the last 24 hours or in the last week.

Exclusive OptiControl function that adapts the radiator to your living patterns, automatically lowering the room temperature slightly when it is empty.

Features

- Built-in display for user-friendly browsing Energy saving technology
- DUAL-THERM heating system: natural convection + infrared radiant heat
- Accurate electronic thermostat
- OPTICONTROL Presence sensor
- 3 built-in weekly setting programs and zoning
- Built-in consumption PowerCheck function
- Open window stand-by sensor
- Easy, quick installation using the assembly kit included, and zero maintenance costs
- IP24 Protection rating against water splashing, perfect to be installed in Bathrooms and damp areas.

Technical Data

KLIMA is available in 4 different versions to suit the comfort to every room environment.

KLIMA Wi-Fi

Low consumption radiators with Wi-Fi controls

Radialight App
available on:

Radialight® introduces the new series of connected Radiators Klima WI-Fi: the perfect fusion of energy-saving technological innovation, Italian design and high level of comfort.

DUAL-THERM technology that combines infrared radiation and natural convection, remotely controlled through your smartphone, thanks to the new Radialight App, with which it will be possible to individually manage each radiator, schedule operation on a weekly basis and view consumption statistics in real time.

The connection between the radiators and the router of your home is direct through Wi-Fi and therefore it will not be necessary to install bridges or intermediate terminals, to get an immediate correspondence between the changes made in the App and the response time of the radiators.

Total and precise control of the comfort of your home, wherever you are, in the simplest way possible, with just one touch of your fingers.

Discover the new generation of KLIMA Wi-Fi heaters!

Heating style

Optimized comfort thanks to the DUAL-THERM double heating system with infrared radiation and natural convection: heat diffused rapidly and uniformly in the environment, in addition to an incomparable natural radiant effect thanks to the wide frontal surface, for a pleasant, enveloping and prolonged heating in time.

Intelligent power management features optimize the consumption levels for the maximum energy savings.

Furthermore, the Radialight App allows you to remotely control KLIMA Wi-Fi radiators, in order to manage temperatures, absence periods and to ensure a very low consumption level.

Control System

KLIMA Wi-Fi integrates a digital display to manually access the radiator control functions. Therefore KLIMA Wi-Fi can be used also when Wi-Fi is not working.

Combined with your home Wi-Fi and the Radialight App, you can manage your KLIMA radiators installed in your home, creating a multi-zone system and independently controlling the comfort level of each room; obtain consistent energy savings thanks to weekly programming or simply manage heating during your periods of absence.

Furthermore, the Radialight App will allow you to view, analyze and compare the consumption of each individual radiator to avoid unnecessary energy waste.

Features

- Integrated display for easy navigation
- Wi-Fi control via the free Radialight App
- Energy-saving technology with consumption optimization
- Dual-therm heating system: infrared radiation + natural convection
- High precision electronic thermostat ($\pm 0.2\text{C } ^\circ$)
- Opticontrol system with presence sensor
- 3 Weekly programming mode: defined by you, Office and Holiday home
- Powercheck function to control energy consumption
- Open window stand-by sensor
- Quick and easy installation with the included mounting kit and zero maintenance costs
- IP24 protection against splashing water, ideal to be installed even in damp places

Technical Data

KLIMA Wi-Fi is available in 4 different models suitable for size and power to meet the needs of any domestic environment.

HEAT
YOUR
BATHROOM

DEVA

Glass Towel warmer Radiator with Digital controls

Essential lines, rounded edges Thin profile. The purity of glass, a natural material that accumulates heat and releases it gently ... While furnishing your bathroom with elegance. Research by Radialight laboratories has produced

DEVA, a unique electric towel warmer radiator, with a combined action.

DEVA is all you need: elegant furnishing element, perfect heating for the bathroom, and warm towels all year round.

Heating style

The discreet, powerful turbo action heats the bathroom in just a few minutes, even for large bathrooms. The glass front, with its exclusive active inertia heating system, radiates all-round heat with low energy consumption, maintaining a welcoming atmosphere, and towels that are always warm.

Control System

Built-in Touchscreen controls DEVA is activated by touching the surface, and displays the temperature required, the time, and the operating mode. COMFORT, ECO, ANTI-FREEZE, PROGRAMMED, TIMER: 5 different operating modes for use to suit all needs and to ensure maximum energy saving.

Features

- Glass Towel warmer Radiator
- Combined heating: convection + Infrared radiation
- Heats any bathroom, making your towels hot and comfortable
- Touch screen controls
- LCD Display
- Energy-saving Function suitable for all your needs
- Integrated USB connector to recharge your smartphone
- 2 adjustable towel bars
- IP24 protection against bursts of water, ideal for installation in damp places

Technical data

DEVA is available in 1500W version and 3 colors: White Onyx, Mirror, Black Volcano

WINDY

Bathroom wall mounted heater. Digital technology and ultra slim design to enhance the comfort of your bathroom

Small, silent and smart: with an ultra-slim design in the thinnest point of only 11.2 cm, WINDY digital bathroom fan heater - also available as WINDY 2B with aluminum towel rails and as WINDY VISIO with aluminum towel rails and mirror - will give your bathroom a hi-tech sophisticated look. This elegant wall-mounted fan heater is able to spread heat quickly, silently and homogeneously.

4 different operation modes will allow you to customize the heat emitted, achieving a customized comfort. Moreover, thanks to the weekly programming functions, it will be possible to adjust the temperature of the bathroom according to your own daily life routine. Say goodbye to cold awakenings and let yourself be surprised by the warm embrace of WINDY.

Heating style

Thanks to the integrated motion sensor, WINDY will emit heat only when necessary, avoiding unnecessary waste of energy, reducing its consumption level, and then automatically bring the temperature back to the set comfort level as soon as a motion is detected.

With its integrated open window sensor, WINDY will avoid any dispersion of heat and consequently any waste of energy, automatically selecting the Frost-free function.

5 pre-set weekly programs, to adapt WINDY to your life rhythm, optimizing the heat emitted and becoming a loyal ally to better enjoy the cold season.

Control System

WINDY integrates touch screen controls on the front:

- Motion sensor
- Led display
- Mode led indicators
- BOOST function for ultrafast heat
- Heat mode selector

Everything has been designed for an easy and intuitive control of the product.

Features

- Touch screen controls + LED display, for a precise regulation of the desired temperature
- 5 pre-set weekly programs
- 4 operating modes: COMFORT, AUTO, PROGRAMMED, FROST FREE
- Motion sensor
- Open window detection function
- BOOST function for ultra-fast heat
- Ultra-flat design: only 11.2 cm thick when installed on the wall
- Removable and washable dust filter
- IP24 protection against splashing water, ideal for installation in damp places
- Product complies with EcoDesign 2018 regulations

TOUCH

Elegance and technology, bathroom wall mounted fan heater with minimal tickness

Safe, silent, and smart: only 11 cm thick and with an ultra-flat design, the TOUCH digital heating fan will give your bathroom a hi-tech touch. Thanks to a completely renewed air circulation mechanism, this wall fan is extremely silent, while guaranteeing quick, even distribution of

heat in your bathroom, as well as heating your towels very quickly. Forget waking up cold or damp bathrooms in the early morning: TOUCH includes a programming function, to get a perfectly heated bathroom at the time you want it.

Heating style

Thanks to the built-in presence sensor, TOUCH will only heat when necessary, avoiding needless wastage of energy.

10 minutes after you leave the bathroom, TOUCH will automatically go into ECO mode (3,5°C lower than the setting on the ambient thermostat), thereby reducing consumption.

Naturally, as soon as it detects someone in the room, TOUCH will automatically take the temperature back to the comfort level set.

Alternatively, you can use TOUCH in a programmed mode, to have the temperature you prefer at the time you want it.

Control System

A-Presence sensor B-Display C-Key + D-Key E-Setting F-Function for the prevention of freezing G-Programming H-Stand-by switch I-Freezing-prevention indicator J-Programmed mode indicator K-Function indicator

Features

- Touch screen controls + LED display for the precise regulation of the temperature desired
- Presence sensor built into the product, to heat only when necessary, thereby avoiding costly energy wastage
- Weekly programming function
- Integrated towel bar + 4 hooks hidden in the lower part of the radiator to dry an extra number of towels
- Ultra-flat design – only 11 cm of thickness when installed on a wall
- Dust-prevention filter which can be extracted and washed
- IP24 protection against bursts of water, ideal for installation in wet places

HEAT YOUR
COMMERCIAL
AND INDUSTRIAL
SPACE

THERMO

Ceiling-mounted radiant panels for industrial and commercial heating

Radiation from above is the ideal solution for resolving heating problems at workbenches in industrial environments such as factory buildings or warehouses, as well as in gyms and on terraces. They can be used to heat an entire space or to create working islands

in specific zones, thereby only heating where needed. They have a large emission area and provide a pleasing heating effect, which is perceived as being pleasant, at temperatures that are not too high.

Heating style

The THERMO panels exploit the advantages of long-wave radiant technology, using aluminium elements that are ceiling mounted, and that also constitute the heat source and radiant surface, in direct contact with the air. This ensures even heating of the area involved, with exceptional thermal comfort, eliminating the disadvantages of alternative heating systems (gas fan heaters, infrared lamps, or halogen mushrooms) used to date for applications of this type.

Features

- Direct heating of specific zones using maximum energy efficiency, with 3 different power levels to choose between, depending on the context
- Heat is evenly diffused, transmitted by long infrared waves which heat up the body and also surfaces, while avoiding stratification of air temperatures
- Great savings in management costs and zero maintenance
- No noise, no air currents, no stirring up of dust
- Quick and easy installation
- The heating system is perfectly modular. THERMO panels can be installed all at the same time, or, in the case of successive extensions, additional panels can be added based on the new need
- IP24 protection against bursts of water

Control System

The THERMO panels can be used with both a single-phase 230v~ and a three-phase 400v~ power supply, provided they have a neutral. This choice can be made by the installer, with the end user's agreement. When a three-phase connection is used, the power absorption in less cold months can be reduced, by only using part of the Heating plant installed.

230V Single phase connection

Three phase connection

Technical data

THERMO range is available in 3 different sizes to choose accordingly with the kind of installation needs (installation height, insulation level, area dimensions etc.)

OASI

Low Glare Infrared heater for Indoor and Outdoor use

When it's there, your space comes alive with new excitement. That's OASI, Radialight's new Heating Lamp. An intelligent solution for heating your spaces, with a refined design and ultra modern technology. Thanks to the dual IR-B carbon heating system, the low glare infrared

rays generated by the OASI radiate heat to your commercial spaces or home, with a unique style that is able to enhance any interior design. For indoors and outdoors - the warm, suffused, low glare light that makes the difference.

Heating style

The medium wave infrared radiation emitted by OASI provides a constant, even flow of heat. It is not bothersome, is highly tolerable, is kind to your skin, and is comfortable. The OASI lamps use LOW GLARE IR-B Carbon heating technology: low glare infrared waves and diffused heat. A perfect combination between immediate heat and reduced glare, to create a welcoming atmosphere in your spaces, that does not interfere with existing lighting.

Control System

OASI Remote (sold separately) allows you to choose the comfort level for each zone in your commercial space, in a practical manner with minimum effort. The practicality and efficiency of this wireless solution is able to manage remote control of up to 6 heaters, using a single remote control unit.

OASI Remote makes significant energy saving possible, thanks to two different power level settings (1000W or 2000W), for each lamp, even from a distance of 20 metres. However, the OASI can also be used without the remote control and can be connected to an external switch.

Features

- Hi-tech design, stylish, sturdy and compact.
- Easy to use: wireless control up to 6 units to optimize comfort with just a single remote control
- Low Glare Medium wave IR-B Carbon heating elements
- IPX 5 splash water protection - ideal for indoor or outdoor installation
- Multiple mounting options: wall, ceiling or pole mounted (sold separately)
- Targeted spot heating for the maximum efficiency and the minimum energy loss
- Bracket allow motion from 25° to 45° angle top to bottom
- Pole mounting single or double

Power cord lenght	4 mt.	
Color	White/Matte Black	
Finishing	Powder Coated Steel body + Aluminium front	

OASI HT

Infrared Halogen heater for Outdoor use

The OASI range of infrared heaters made by RADIALIGHT do their utmost to give you even more heat. Design combines with performance, beauty of form is at one with heating power. This is OASI HT, the brand new infrared outdoor patio heater by RADIALIGHT for heating and embellishing outside areas and verandas exposed to the wind, humidity in the air, and the weather.

This new range of weatherproof infrared heaters was designed to spread heat out over distance, in outdoor areas affected by wind and cold temperatures, where heated air cannot easily be contained (such as patios, restaurants verandas, alfrescoes atc. etc.). Heat is pointed into specific directions and instantly transferred directly to people, surfaces and solid objects, resulting in a pleasant warming effect.

Heating style

OASI HT's halogen heating element generates short-wave infrared IR-A heating, that works just like the sun, having a warming effect the instant the heaters are switched on, so leaving you saving energy, keeping them switched off when an area is not occupied.

Its irradiation spectrum is not absorbed by the humidity in the air, and is perceived intensely even in outdoor settings, transferring heat directly to a person, table or floor, making it the ideal product for patios, bars, restaurants or dining places, that need to maximise the access to their outdoor areas all year round.

A special aluminium reflector with a hammered surface, is able to reflect and propagate more than 90% of the thermal energy emitted by the high quality halogen heating element: energy efficiency meet high comfort and style.

Multiple installation options

OASI/HT has been specifically designed to work for outdoor use, against wind and humidity, and is certified to have a protection level of IP X5, so not directly exposed to the rain.

OASI HT features multiple installation options:

- Wall-mounted using metal brackets, at an adjustable inclination in order to direct the heat where it is needed.
- Ceiling mounted, or suspended right over the areas to be heated
- Pole mounted, provided as an optional accessory, on which up to 2 units can be mounted.

Due to its outstanding performance, OASI HT can also be used in industrial and commercial environments, where "spot" heating is required.

Features

- Hi-tech and stylish design, elegant, compact and sturdy.
- High thermal performance due to the short-wave IR-A heating technology and the special aluminium reflector with its hammered surface..
- IPX 5 protection against sprays of water - ideal for indoor or outdoor installations
- Multiple installation options: wall-mounted, ceiling suspended, pole mounted (sold separately).
- Directional heat for maximum heating efficiency and minimum energy loss
- Adjustable from 25° to 45°
- Single or double installation on pole
- 100% Manufactured in Italy

PORTABLE HEATING

The range of AURORA portable fan heaters has been designed to heat your rooms quickly, only when needed, with a hi-tech design and features that differentiates it from other products currently available

Portable Fan Heaters for a quick and easy warmth in your Home

on the market.

Silent operations, safe and usable even in damp areas like your bathroom thanks to IP21 protection rating against humidity.

Model	LITHO	CALYPSO DIGITAL
Description	LITHO fan heater features a greater efficiency of heating power, and a SILENT operation mode, with a power of only 1800W. The dust filter, removable and washable, guarantees a constant product efficiency over the years.	CALYPSO DIGITAL indirect heating fan heater. Design and functionality come together in a unique, elegant product that marks a step forward compared to other portable fan heaters on the market. Enveloping heat diffused homogeneously in the environment thanks to indirect air emission. Silent operation mode, digital controls and programmable on a daily basis.
Features	• Comfortable air flow with 3 power levels controlled by the central knob: Cold air, Warm air 1000W and Hot air 1800W • Ambient thermostat • Removable and washable dust filter, suitable for maintaining a healthy air quality • Silent operation • LED light alarm in case of malfunction • Double protection against overheating • Color: White	• Circular air outlet grille for an indirect and homogenous diffused heat • Comfortable air flow with 2 power levels: Warm air 1000W and Hot air 2000W • 5 Operating Modes: Cold air ventilation, Comfort, Frost protection, Timer and Daily programming • AUTO Energy Saving Function • Integrated LCD screen • Silent operation up to 40% less than other fan heaters • Operating LED light • Pedestal in aluminum • Protection against overheating • Color: White / Ocean Blue Frame

AIR COOLERS

Portable Evaporative Air Coolers for domestic and Commercial use

The range of portable evaporative coolers OMNI and AER DOMUS is the most economical and efficient solution for cooling indoor or outdoor spaces, domestic or commercial environments, such as bars, restaurants and outdoor areas.

They do not require any installation or maintenance or external unit, they are ready to use, easy to position and move.

The costs of purchase, installation and use are reduced up to 10 times compared to traditional air conditioners

LED display with digital controls, remote control and possibility of timing their

operations up to 8 hours

Several integrated functions: Ventilation mode (Normal - Natural - Night) and Ventilation intensity (Turbo - Medium - Silent)

Double air purification system: the removable and washable dust filter and the evaporative panel guarantee the constant purification of the air with a ionizing action

2 models available: OMNI the Multifunction to enjoy a perfect climate whole year long, AER DOMUS ideal for refreshing domestic environments up to 16 sqm.

Air Cooling Style

The Fresco range by Radialight is the ideal cooling system for hot summer days. Elegant layout and design for unique, compact and multifunctional devices: fan, cooler, ionizer and fan heater (OMNI only). The small size and the lack of external pipes, make the products of this range, perfect to be placed safely in any corner of the room that you need to cool.

Control System

AER DOMUS and OMNI can be managed from the control panel or via the included remote control, with which you can choose between different cooling or ventilation modes.

The water tanks integrated in the products together with the included cooling ice panes increase the diffused air cooling level.

In addition to the cooling function, the FRESCO range of Radialight also features a ioniser function which, in combination with the dust filter, purifies the air.

Technical data

Model	AER DOMUS	OMNI
Ean Code	8019250975688	8019250233214
Power @ 230V	45W	50W Air Cooling Mode / 2000W Fan Heating Mode
Maximum air flow rate	400 m ³ /h	300 m ³ /h
Maximum air speed at outlet	6 m/sec	5 m/sec
Maximum area cooled	12 m ²	12 m ²
Maximum tank capacity	6 lt	2 lt
Maximum noise level	55 dBA	55 dBA
Dimensions in cm. (W x H x D)	26 x 96 x 26	27,4 x 85 x 27,4
Color	White	White

An aerial photograph of an industrial facility, possibly a refinery or chemical plant, during the "golden hour" of sunset. The sun is a bright, glowing orb in the upper center of the frame, casting a warm, orange and yellow light across the sky and the landscape. The sky is filled with soft, wispy clouds. The industrial structures, including tall distillation columns, storage tanks, and a complex network of pipes and walkways, are silhouetted against the bright sky. In the foreground, a large, cylindrical storage tank is visible. The background shows a vast, flat landscape with some greenery and a few distant buildings under the expansive sky.

AER MAX

Power and design combined

Its sinuous, iconic shape, that resembles a jet engine, and its performance, will not disappoint you. The air flow of up to 6,000 m³/h and very large, 80-litre water tank make Aer MAX the ideal solution for a breath of fresh air on the hottest days of the

year, in rooms of up to 50 m² in area. Its electronic technology provides a digital display that indicates its operating mode in real-time, as well as an attractive, handy remote control.

Cooling style

As the hot air passes through the evaporative filter, it absorbs the humidity, cools down a few degrees, and is also purified.

On contact with your skin, the moist, cooler air gives a sense of well-being. The drier and hotter the environment, the more impressive the effect.

Control system and air flow rate

The titanic mass of cooled air that Aer MAX manages to move around, at the touch of the remote control, is perfect for industrial and large crowded areas.

Features

- An evaporative cooler for use in large size environments such as warehouses, workshops, commercial spaces, waiting rooms, etc.
- Manually operated using the user-friendly touch panel or elegant remote control supplied.
- LCD display showing the operating mode and ambient temperature.
- 3 different fan speeds.
- Horizontal and vertical oscillation, which can be used together or separately.
- Fitted with casters for easy movement.
- Continuous or timed operation, from 1 to 12 hours.
- Manual or automatic tank filling.
- Easy to use tank emptying system, with a tap.
- Empty tank/Low water alarm (when using the cooling function).
- Tank capacity: 80 litres with level gauge.
- Maximum output flow rate: 6,000 m³/h. Output air speed at maximum power: 6 m/sec.
- Cooled area: 50 m² at maximum power
- Maximum noise level: 75 dBA.
- Maximum power absorption: 230V, 50 Hz, 250W

Data

Aer MAX	
Ean	8019250987629
Power at 230V, 50hz	250W
Maximum air flow rate	6.000 m ³ /h
Max fan speed	6 mt/sec
Maximum cooled area	50 m ²
Maximum tank capacity:	80 lt
Maximum noise level:	75 dBA
Dimensions in cm (W x H x D)	84,8 x 125,4 x 55,5
Colour	Light gray
Weight	21,2 kg

AER PRO-N

Cooling has never been this silent

The centrifugal ventilation technology used for AER PRO-N offers you an air cooler for commercial use and outdoors that is powerful but, above all, one of the quietest in its category.

When the heat intensifies in the office or during evenings spent with friends, sitting in a restaurant or on an outdoor veranda, AER PRO-N will be your ideal companion.

Cooling style

Fan / air cooler combination, with 3 power levels, purification filter, and humidifier, 3 fan modes, with the option of activating oscillation, making it possible to adjust the device to suit the climate, the dimensions of the environment, and exactly where guests are sitting. A pleasantly cool feeling, even on the hottest summer days.

Control system and air flow rate

AER PRO-N can be operated using the control panel on the front, or the handy remote control that is included.

3 power levels: low, medium, and high. Air cooling with maximum coverage of 30 m² thanks to the automatic air flow circulation mechanism.

Features

- Evaporative cooler for use in large environments, such as offices or public areas.
- Manually operated using the simple touch panel or remote control supplied.
- 3 different fan speeds.
- Horizontal oscillation through an angle of about 60°.
- Manual downward orientation of the air deflecting fins.
- Continuous or timed operation, from 1 to 7.5 hours.
- Manual or automatic tank filling.
- Tank emptying system, with a tap.
- Fitted with casters for easy movement.
- Empty tank/Low water alarm (when using the cooling function).
- Tank capacity: 40 litres with level gauge.
- Maximum output flow rate: 3,500 m³/h
- Cooled area: 30 m² at maximum power
- Maximum noise level: 58 dBA

Data

AER PRO-N	
Ean	8019250987612
Power at 230V, 50hz	250W
Maximum air flow rate	3500 m ³ /h
Max fan speed	4 m/sec
Maximum cooled area	30 m ²
Maximum tank capacity	40 l
Maximum noise level	58 dBA
Dimensions in cm (W x H x D)	60 x 168 x 43
Colour	White
Weight	35 kg
